HIKMET ARAS
School manager

Our school was opened in 1967 with the name of Buyukcekmece High School. Our school has boasted of being one of the most important schools of Istanbul. Our school received the Anatolian High School status in 2013. The majority of the graduates have passed the university exam and gone on to higher education. Our school has all the necessary substructure for quality and eligible education. In our school, there is a smart board in all classrooms within the "Fatih Project". Most of the lessons are taught by teachers on these smart boards. Educational materials such as video-tapes, slide shows, test techniques, sample question solutions are used effectively. The school is in the leading position of the district in the areas of social, cultural and sports. Our only goal is to get the students ready for either their career or higher education by enlarging their interests and abilities. We appreciate our each student as they are invaluable for their family. We make much of teaching and education. It is among our basic aims to educate our students as they design their world of the future. Likewise, qualified human power is the most valuable asset of our country and mankind. We are dedicated ourselves to raising people who are full of humanism, fundamental to scientific references, give our country and light our world. We will be going on working for this country with each student and staff joined us.

VISION

Our vision serves as being the most preferred school in the region, having the highest achievement rate in the university education with its students and regions, having achieved high grades in national and international contests and competitions.

MISSION

Be progress mediator of student, teacher and environment partner as a source of information, progress and advancement. Raise individuals who are happy and pleased, provided with modern world skills and aiming to enrich the society, depending on basic and national values and having self-confidence.

VALUES

Support Atatürk's principles and reforms, stay connected to establishment and sustain it. Be open-minded to progress and development in the consideration of science. Mind and support academic, socio-cultural improvement and change. Follow and apply the technological progress. Support the creative and free ideas ground on respect, trust and tolerance in communication. Internalise awareness of we instead of I. Be a part of solution rather than being a part of a problem. Be sensitive to social issues. Have awareness of protecting the nature and keep alive.
